

We were created and born with imagination. Our imagination is the driving force and engine that shapes our growth. Today, we have our known 5 senses of sight, sound, speech, taste and touch. What came first, the 5 senses or imagination? Could it be that imagination is mysterious because it is the life source of man? Could it be that imagination was designed as the hidden program of sorts that has shaped our 5 senses of today over thousands of years? Is any understanding of human evolution possible without the existence of imagination?

As we continue to explore, imagine that every letter has both a surface story that anyone can look up along with a hidden story that shows more. Everyone can research the history of a letter. Can we see more by using our senses and imagination?

We will focus on the following letter.

W

- 1.) It is the 23<sup>rd</sup> Letter Of The English Alphabet
- 2.) It Is pronounced Double-u
- 3.) U shares the exact pronunciation of YOU
- 4.) Double or 2 of
- 5.) W = Double U = Double YOU = 2 of YOU

## Question

What is the connection between the number 23 and the pronunciation of W, which is Double YOU defined as 2 of YOU?

## Answer

Genetics: We are all born with 2 sets of 23 chromosomes including one set of 23 chromosomes from our mother and one set of 23 chromosomes from our father.

Could it be that this description is a creative coincidence?

Either way, the message in one letter of the alphabet is fun to explore. Exploring this naturally creates a magic feel as we see something for the first time. Rather than considering this as a theory, our imagination allows us to explore a new connection between some pieces of a puzzle that was already here.

To enhance the natural magic feel, have fun while we explore the word WAND and extend our list of connections using some of our 5 senses.

# WAND

1. W is the 23<sup>rd</sup> Letter Of The English Alphabet
2. It Is pronounced Double-u
3. U shares the exact pronunciation of YOU
4. Double or 2 of
5. W = Double U = Double YOU = 2 of YOU
6. We have 2 sets of 23 chromosomes (one set from mom and one set from dad)
7. Two anagram words (names) can be found in the word WAND (DAWN & DAN)
8. Dawn is a female name representing the 23 chromosomes we have from mom.
9. Dan is a male name representing the 23 chromosomes we have from dad.
10. The remaining letters outside the W in WAND are AND.
11. Scramble the letters of AND to find the anagrams that can be acronyms.
12. An acronym is when initials mean something.  
Example: CIA is the acronym for Central Intelligence Agency
13. The word AND includes 2 anagram acronyms. DNA and NDA.

14. Our genetic DNA includes 2 sets of 23 chromosomes, one from mom and one from dad. We can call this the Double You or 2 of you.
15. **NDA** is the acronym for **Non-Disclosure Agreement**. Basically, a confidential or top secret agreement between two parties.

Everything we have discovered while exploring this **Message In A LETTER** can be considered as top secret information that has been hiding in plain sight. It is fun to think that a message starting with one letter could have been **MIA (Missing In Action)**. Maybe it was set as a game in our imagination, by imagination, dating back to the creation of man. How many more secret messages could be hiding in plain sight just waiting to be connected?

***Imagine that!***
